

Worldwide Specialists in Electric Heat Tracing

Product Catalogue

# THE HTS GROUP

The HTS Group of companies is one of the leading manufacturers of high-performance heat tracing cables in the world. From our core production unit HTS Global Production GmbH with manufacturing plants in Germany, Switzerland and the United Kingdom, we successfully cater to major and niche markets worldwide. Due to our sophisticated network of international subsidiaries and distributors, we can ensure prompt deliveries and unique customer service for the entire range of our heat tracing products. At HTS Global, we are proud to offer our customers the full spectrum of heat tracing solutions designed to meet all possible heating needs.

All of our technically advanced and innovative self-regulating heating cables fully comply with all international quality standards (CE, ATEX, IECEx, EAC). Adhering to these norms allows our customers to apply our products not only in safe areas but in challenging and hazardous environments, including in the industrial and the construction sectors.

The HTS Group is committed to customer-focused product innovation. Therefore, all of our products echo the latest technological advancements, which aids our customers to adapt to changing demands in their sectors promptly. Our specialists are just one phone call away and are always happy to assist you. According to your needs, our staff will ascertain which of our products best meets your demands and budget by reviewing environmental, technological and circumstantial requirements of your intended area of application.

## Our brands

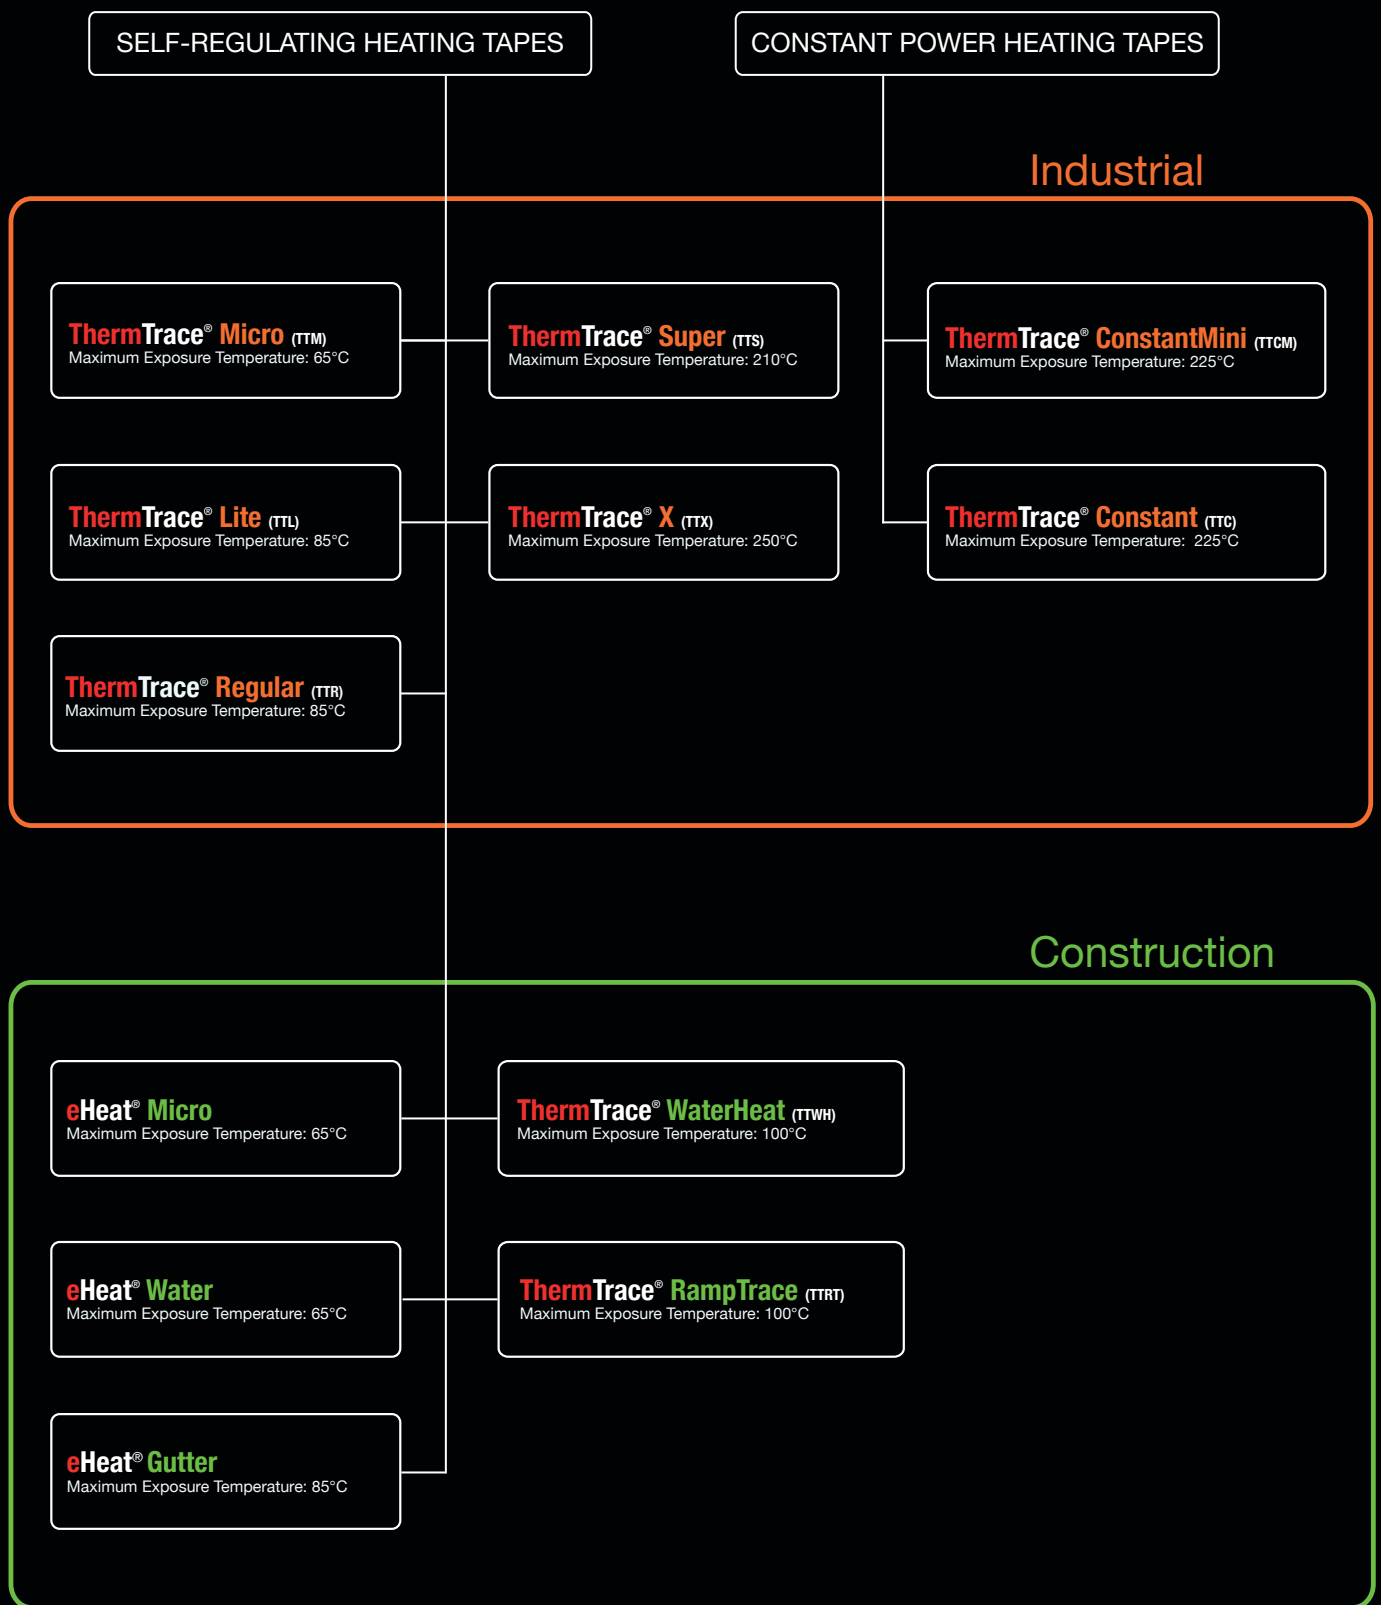

### **HTS ThermTrace<sup>®</sup>**

Our ThermTrace series of high-performance self-regulating tapes offers the most advanced and reliable solutions for low to high-temperature applications. Developed for employment in harsh environments and extreme operating conditions, the ThermTrace series includes products such as heating cables for freeze protection of small piping systems or high-end industrial grade cables for temperatures up to 250°C. In addition to our self-regulating cables, we offer constant wattage heating tapes as well as a broad variety of accessories.

### **HTS eHeat<sup>®</sup>**

With the eHeat series, HTS Global has introduced a highly competitive and reliable product line of self-regulating heating tapes. They are particularly suitable for easy to use low-temperature applications and can be used for all major purposes in the construction sector.

# Our products

# ThermTrace<sup>®</sup> Micro (TTM)

SELF-REGULATING PARALLEL HEATING TAPE

up to  
**65°C**

## Properties

- Self-regulating
- 3 power output ranges
- Cut-to-length
- Small dimensions

## Applications

The ThermTrace Micro is a construction grade self-regulating heating tape that may be used for freeze protection and low-temperature maintenance of pipework and vessels up to 65°C. With its flexible properties, it can be applied where installation dimensions are small.

## Technical data

Maximum exposure temperature (unpowered):	65°C
Maximum operating temperature:	65°C
Nominal voltage:	230V
Min. bending radius:	30mm
Min. installation temperature:	-45°C
Buswires:	nickel plated copper

 TTM-2-BOW: Cable with protective braid and food-safe overjacket

## ThermTrace® Micro 11TTM-2-BOW

The 11TTM-2-BOW is special designed to be used inside potable water pipes. The cable has a food-safe outerjacket for internal trace heating with the following technical specification for applications inside potable water pipes:

Maximum recommended length of heating circuit at 230 VAC using Type-C circuit breakers:

Product Reference	Circuit Breaker	+10°C	0°C	-20°C
11TTM-2-BOW	10A	70m	55m	40m
11TTM-2-BOW	16A	85m	61m	47m

Maximum recommended length of heating circuit at 230 VAC using Type-C circuit breakers:

Product Reference	Circuit Breaker	+10°C	-10°C	-20°C
11TTM	10A	113m	95m	85m
11TTM	16A	120m	105m	98m

# ThermTrace<sup>®</sup> Lite (TTL)

SELF-REGULATING PARALLEL HEATING TAPE

up to  
**85°C**

## Properties

- Self-regulating
- 4 power output ranges
- Cut-to-length
- UV-resistant

## Applications

The ThermTrace Lite is a construction and industrial grade self-regulating heating tape designed for a wide range of applications. It may be used for freeze protection or low-temperature maintenance of pipes and vessels in hazardous areas as well for roof and gutter heating in the construction sector.

## Technical data

Maximum exposure temperature (unpowered):	85°C
Maximum operating temperature:	65°C
Nominal voltage:	230V
Min. bending radius:	25mm
Min. installation temperature:	-50°C
Buswires:	nickel plated copper

# ThermTrace® Lite (TTL)

Name	Power output on insulated metal pipes at 5°C (W/m)	Maximum permissible temperature (°C)	Nominal Dimension

# ThermTrace<sup>®</sup> Regular (TTR)

SELF-REGULATING PARALLEL HEATING TAPE

up to  
**85°C**

## Properties

- Self-regulating
- 4 power output ranges
- Cut-to-length
- Approved for use in hazardous areas
- Also available as Halogen-free version

## Applications

The ThermTrace Regular is a construction and industrial grade self-regulating heating tape that may be used for freeze protection and low-temperature maintenance of pipes, vessels and tanks. It is approved for use in hazardous areas. The BOT version of the ThermTrace Regular even withstands aggressive chemicals, oil and fuel.

## Technical data

Maximum exposure temperature (unpowered):	85°C
Maximum operating temperature:	65°C
Nominal voltage:	230V
Min. bending radius:	25mm
Min. installation temperature:	-45°C
Buswires:	nickel plated copper

# ThermTrace<sup>®</sup> Super (TTS)

SELF-REGULATING PARALLEL HEATING TAPE

up to  
**210°C**

## Properties

- Self-regulating
- 4 power output ranges
- Cut-to-length
- High chemical resistance

## Applications

The ThermTrace Super is an industrial grade self-regulating heating tape for high temperatures. Its application ranges from freeze protection and temperature maintenance of pipework and vessels in a large number of industrial applications and Ex-areas such as power plants and the chemical and petrochemical industry. The ThermTrace Super withstands aggressive chemicals and oil tanks to his fluoropolymer overjacket.

## Technical data

Maximum exposure temperature (unpowered):	210°C
Maximum operating temperature:	120°C
Nominal voltage:	230V
Min. bending radius:	25mm
Min. installation temperature:	-45°C
Buswires:	nickel plated copper

### Temperature (°C) / Loading (W/m) diagram

# ThermTrace<sup>®</sup> X (TTX)

SELF-REGULATING PARALLEL HEATING TAPE

up to  
**250°C**

## Properties

- Self-regulating
- 4 power output ranges
- Cut-to-length
- Chemical resistant
- For extremely high temperature

## Applications

The ThermTrace X is an industrial grade self-regulating heating tape for extremely high temperatures. Its application range from freeze protection and temperature maintenance of pipework and vessels in a large number of industrial applications and Ex-areas such as power plants or chemical, petrochemical or oil and gas industry.

## Technical data

Maximum exposure temperature (unpowered):	250°C
Maximum operating temperature:	165°C

# ThermTrace® WaterHeat (TTWH)

SELF-REGULATING PARALLEL HEATING TAPE

up to  
**100°C**

## Properties

- Self-regulating
- 2 power outputs
- Cut-to-length
- Moisture proof
- Heat tracing of fat lines

## Applications

The ThermTrace WaterHeat is a construction grade self-regulating heating tape that is special designed for hot water systems. It serves for frost protection, temperature maintenance and prevention of legionella formation. The 33 TTWH is frequently used to heat oil and fat lines, for example in the food processing industry.

## Technical data

Maximum exposure temperature (unpowered):	100°C
Maximum operating temperature:	80°C
Nominal voltage:	230V
Min. bending radius:	20mm
Min. installation temperature:	-20°C
Buswires:	nickel plated copper

# ThermTrace® WaterHeat (TTWH)

Name	Power output in typical application (W/m)	Maximum permissible temperature (°C)	Nominal Dimension
25 TTWH-2-BO	9 W/m at 55°C	100	13.0 x 5.0
33 TTWH-2-BO	12 W/m at 60°C	100	13.0 x 5.0

Maximum recommended length of heating circuit at 230VAC using Type-C circuit breakers:

Temperature (°C) / Loading (W/m) diagram

# ThermTrace® RampTrace (TTRT)

SELF-REGULATING PARALLEL HEATING TAPE

up to  
**100°C**

## Properties

- Self-regulating
- Special designed for use in concrete
- Cut-to-length
- Highly robust

## Applications

The ThermTrace RampTrace is a construction grade self-regulating heating tape applicable for snow and ice melting of ramps, stairs, walkways and helicopter landing platforms. To ensure a high mechanical load capacity, the ThermTrace RampTrace is especially robust.

## Technical data

Maximum exposure temperature (unpowered):	100°C
Maximum operating temperature:	85°C
Nominal voltage:	230V
Min. bending radius:	40mm
Min. installation temperature:	-30°C
Power output at 0 °C in concrete:	80 W/m

# eHeat<sup>®</sup> Micro

SELF-REGULATING PARALLEL HEATING TAPE

up to  
**65°C**

## Properties

- Self-regulating
- 2 power output ranges
- Cut-to-length
- Economical solution for small pipes
- Small dimensions

## Applications

The eHeat Micro is a construction grade self-regulating heating tape that may be used for freeze protection and low-temperature maintenance of pipework and vessels up to 65°C. With its flexible properties, it can be applied where installation dimensions are small.

## Technical data

Maximum exposure temperature (unpowered):	65°C
Maximum operating temperature:	65°C
Nominal voltage:	230V
Min. bending radius:	35mm
Min. installation temperature:	-30°C

# eHeat® Gutter

SELF-REGULATING PARALLEL HEATING TAPE

up to  
**85°C**

## Properties

- Self-regulating
- UV protected overjacket
- Moisture proof
- Cut-to-length

## Applications

The eHeat Gutter is a construction grade self-regulating heating tape for roof and gutter heating. For this purpose, this tape comes with a UV protected outer jacket.

## Technical data

Maximum exposure temperature (unpowered):	85°C
Maximum operating temperature:	65°C
Nominal voltage:	230V
Min. bending radius:	35mm
Min. installation temperature:	-30°C

# eHeat® Gutter

Name	Power output on insulated metal pipes at 10°C (W/m)	Maximum permissible temperature (°C)	Nominal Dimension
eHeat Gutter	20*	85	10.5 x 5.9

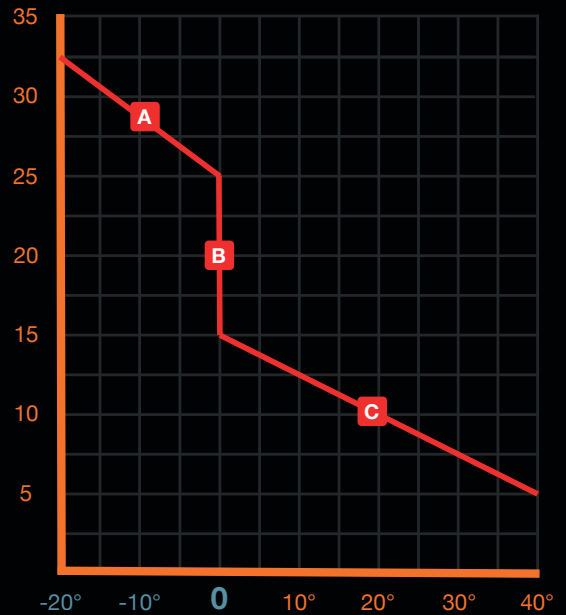

\* 40W/m at 0°C in ice water

Maximum recommended length of heating circuit at 230 VAC using Type-C circuit breakers for use in ice water environment:

Product Reference	Circuit Breaker	0°C	-10°C	-20°C
eHeat Gutter	16A	58m	50m	45m
eHeat Gutter	20A	78m	64m	58m
eHeat Gutter	30A	115m	90m	80m

Temperature (°C) / Loading (W/m) diagram

- A: In snow and ice water, the heating tape will operate at full power
- B: As the snow melts and the water drains off, the heating tape self-regulates to half power while it dries
- C: As it gets warmer, the heating tape reduces its power output further in correspondence to the outside temperature

# ThermTrace® ConstantMini (TTCM)

PARALLEL CONSTANT POWER HEATING TAPE

up to  
**225°C**

CE EAC

## Properties

- Connection at one end
- Cut-to-length
- Constant loading
- Highly flexible
- High temperature withstand

## Applications

The ThermTrace ConstantMini is a construction and industrial grade parallel constant wattage heating tape. It has especially been designed for frost protection and temperature maintenance of pipes, gutters and tanks as well as for use in refrigeration applications.

## Technical data

Maximum exposure temperature (unpowered):	225°C
Nominal voltage:	230V
Min. bending radius:	25mm
Min. installation temperature:	-60°C
Buswires:	tinned copper

Other wattages and voltages can be manufactured to order

**! Product ordering information:**

TTCM-2: Cable with first insulation only  
TTCM-2-BO: Cable with protective braid and silicone overjacket

# ThermTrace® Constant (TTC)

PARALLEL CONSTANT POWER HEATING TAPE

up to  
**225°C**

CE EAC

## Properties

- Connection at one end
- Cut-to-length
- Constant loading
- Highly flexible
- High temperature withstand

## Applications

The ThermTrace Constant is a construction and industrial grade parallel constant wattage heating tape. It has especially been designed for frost protection and temperature maintenance of pipes, gutters and tanks as well as for use in refrigeration applications.

## Technical data

Maximum exposure temperature (unpowered):	225°C
Nominal voltage:	230V
Min. bending radius:	25mm
Min. installation temperature:	-60 °C
Buswires:	tinned copper

# ThermTrace® Constant (TTC)

Name	Max. length	Zone length	Dimensions	Max. operating temperature
10TTC-2	200m	1m	10.0 x 5.9	180°C
15TTC-2	140m	1m	10.0 x 5.9	170°C
20TTC-2	130m	1m	10.0 x 5.9	150°C
30TTC-2	115m	1m	10.0 x 5.9	135°C
40TTC-2	100m	1m	10.0 x 5.9	110°C
50TTC-2	85m	1m	10.0 x 5.9	95°C
60TTC-2	70m	1m	10.0 x 5.9	70°C
10TTC-2-BO	200m	1m	12.5 x 8.8	180°C
15TTC-2-BO	140m	1m	12.5 x 8.8	170°C
20TTC-2-BO	130m	1m	12.5 x 8.8	150°C
30TTC-2-BO	115m	1m	12.5 x 8.8	135°C
40TTC-2-BO	100m	1m	12.5 x 8.8	110°C
50TTC-2-BO	85m	1m	12.5 x 8.8	95°C
60TTC-2-BO	70m	1m	12.5 x 8.8	70°C

Other wattages and voltages can be manufactured to order

**! Product ordering information:**

TTC-2: Cable with first insulation only  
 TTC-2-BO: Cable with protective braid and silicone overjacket
